

# WORLD HAPPENINGS

## BRIEFLY TOLD

Canada's unemployment insurance balance at the end of that year was \$100,000,000, the Department announced.

Prince Philip of Greece has been granted British naturalization under the name of Philip Mountbatten, the London Gazette announced.

Administration of food and agriculture in the British and American dominions of Germany has been transferred to German hands.

Increased value payments to bondholders in Germany will cost the treasury an additional \$20,000,000 (\$200,000,000) were approved by the economy.

Likelihood of an increase in the price of milk distributed in British Columbia was forecast by Agriculture Minister Frank Pridmore.

National Affairs Minister St. Laurent announced that Canada plans to build two low-frequency, long-range navigation stations in her far-north this summer as aid to Arctic and maritime navigation.

Dr. Arnold Hargrave E. Boyd said that a new medical plane for the Pacific scientific expedition has been ordered by the Canadian government.

A price of \$20 (\$120) was awarded a London aircraft maker for a new-type shell which will be made in two stages as soon as it can be manufactured.

Letters and letter packages up to one-half ounce weight can be mailed to any destination in Germany, the postal department has announced. Air mail as well as surface mail service is provided.

## Defends Canadian Cheddar Cheese

LONDON.—Canadian cheddar cheese is not as much as some people think it is, said a spokesman for the Canadian Dairy Board.

Dr. E. H. Keating, Canadian member for Twickenham, to ask if Canada, with its enormous production of milk, could be persuaded to make more cheddar for export.

While other members, resigned to the notion of two ounces of any cheese, said, "I'm not a cheddar."

Keating revealed ripe English cheddar, aged at least six months, is the best. "It's a good cheese," he said.

## UNDERGROUND IN RUSSIA CROWDED

Ross Munn, Canadian Press Staff Writer, tells this story: To meet a high proportion of Moscow's 7,000,000 citizens you just pay your 40 kopecks for a ride on the city's underground and in 4 p.m., peak of the Russian rush hour.

Londoners, New Yorkers and Parisians haven't a clue on how crowded underground railway line can be.

You start at Revolution Square station near the Kremlin. You're nearly out your ticket before you are caught up in a surging tide of Russians being swept down a wide subway.

You hunched feet before you stand in the mass of people and the underground train arrives to a stop.

The doors open and there is a confused shriek as though someone fumbled the ball on the Olympic field. In a couple of seconds you find yourself submerged under a tide of Russian with a smog of hundred Russians.

This confusion of two or three more crowded stations which the Russians are justly proud of. Each stop produces another massive surge in and out of the automatic doors of these modern trains. There is something reminiscent about a Soviet train.

You return by the same line, being compressed progressively more and more as you approach the heart of the city. At Revolution Square you leave the train from the train and on to your hotel.

## United States And Canada Plan Defense

WASHINGTON.—First Assistant Chester W. Nimitz announced that the United States and Canada have agreed to a joint plan for the defense of the United States in preparation for a possible attack.

This includes a joint plan for the defense of both countries. Nimitz, top navy officer, said "once pressure, integrated and complete defense plan is constantly being revised."

The matter was raised by Senator Styles Bridges (Rep.-N.H.) at hearing of national defense, said War Secretary Patterson had told the committee there is no such plan.

Shaking his head, Nimitz said the United States plan calling for use of the Army, Navy and Air Force to ward off any possible attack.

He said the plan for each defense of the United States and Canada from attack is not a joint plan, but a separate one.

## FOOD RIOT IN DUNDELORE

A food riot is being staged by 100-200 in Dundelore, one of the most heavily bombed cities in Germany. It is not an uncommon sight to see soup lines or a child, such as the one in the picture, being led by the hand to the soup line.

British soldiers were hooded and a military band was overheard in a public park to protest the lack of food. The daily ration is far below the Canadian standard.

## MAPLE SYRUP YIELD BEST IN YEARS

If you like lots of maple syrup on your pancakes and in those delicious maple cakes, you may be able to apply it more liberally this year. Says that the sugar in running sap in the maple sugar bushes of Ontario, there are early signs that the yield will be the best in years.

Canadian Press survey shows that production in 1947 may come close to that of previous years when Ontario produced an average of 580,000 gallons annually in the five-year period, 1943-47, then slipped to a low of 350,000 in 1948 and 1949.

Total production this year may be between 400,000 and 450,000 gallons, said an Ontario department of agriculture official. He also told the Canadian Press: "Your guests are as good as mine."

# Agriculture Minister Sees More Profits For Livestock Producers

—Britain, U.S. Are Markets

BRANDON, Man.—Agriculture Minister Gardiner said that even at the present prices for coarse western farmers could make more money by feeding their pigs to livestock than by selling it.

He told a service club luncheon that the government would have offered western farmers into producing more livestock products by keeping down the returns for their grain. "You know the present cost and not raising the return for livestock grain is not covering him to do anything."

Mr. Gardiner said he realized that the farmers did not want the labor to feed stock, but western producers of grain were entitled to their share whether they desired to or not money by feeding hogs or not.

In order to prevent surplus production to Canada from depressing the domestic price he said that in future Canada would be asked to pay for its share of its share, or part of the surplus, but also to pay for the surplus and to pay for the surplus and to pay for the surplus.

Additionally, it should produce enough hogs to be able to pay for it, to Great Britain if agricultural products in the Dominion were to be surplus.

The only two markets Mr. Gardiner said he knew of that these hogs could be sold were the United States and Great Britain. "The only two markets Mr. Gardiner said he knew of that these hogs could be sold were the United States and Great Britain."

Great Britain, the other hand, was selling Canada to supply its market. "The only two markets Mr. Gardiner said he knew of that these hogs could be sold were the United States and Great Britain."

"In my opinion there is greater value in British farmers' meat than in Canada from depressing the domestic price he said that in future Canada would be asked to pay for its share of its share, or part of the surplus, but also to pay for the surplus and to pay for the surplus."

**LARGE SUM APPROPRIATED FOR PRAIRIE PROVINCES**

NEW ORLEANS.—The sum of \$1,397,000 was a nine-year period has been appropriated for waterfowl research in the prairie provinces, the board of trustees of Ducks Unlimited announced.

John William C. Ross, president of Ducks Unlimited (Canada) said the organization would have no change in policy.

"We will be able to expand our waterfowl research program during this post-war year so that we can continue to serve an important purpose in the duck country of the world."

RUSSIA TO SHIP LUMBER TO BRITAIN

WASHINGTON.—Reports reaching Washington said Soviet Premier Joseph Stalin had agreed to facilitate export of Russian timber to Britain.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**CO-ORDINATION OF ARMED SERVICES**

OTTAWA.—A further step in co-ordinating Canadian armed services was announced with the approval of a plan to pool the main part resources of the army, navy and air force.

The plan, announced by defence headquarters, the army will assume responsibility for the procurement, storage and major repair of vehicles and mobile engineering equipment. Each service will, in most cases, provide its own drivers and crew and maintenance and repair of its vehicles.

**Jack Miner National Wild Life Week**

A bill to make the week of April 19th, each year, known as the Jack Miner National Wild Life Week, has been introduced in the House of Commons.

April 19th, was the birthday date of late Jack Miner. It is the 10th of the year when the birds are returning to Canada so it is appropriate to name it Jack Miner National Wild Life Week. It is not meant to be a holiday or even a period when school children will study the value of bird life to the conservation and a day when service clubs might sponsor a bird show.

# Discussion On Control Bill May Be Shortened

OTTAWA.—The possibility has arisen that the government might have to apply the party-control procedure of "closure" to the debate on the bill, if the discussion, now being in the commonsense view of the government's situation, is not shortened.

By this method, the government is enabled to bring a debate to an end within 48 hours after closure is applied.

Parliamentary sources stated that if the government's position of closure would be only for a last resort, the government would be only for a last resort, the government would be only for a last resort, the government would be only for a last resort.

**This Little Pig Is A Tough Little Pig**

THETIS ISLAND, B.C.—Former Thetis Island, B.C., farmer, recovering from his seaman life, is now a tough little pig.

Boyle was attending to a 150-foot tree when he noticed a hold-down pig tied to the trunk.

A heavily-furred pig, he said, was tied to the trunk of the tree.

The pig, he said, was tied to the trunk of the tree.

**BRITAIN ANXIOUS FOR SOVIET TRADE**

MOSCOW.—Britain is keenly interested in the Soviet trade with Russia and it would be glad to trade with Russia.

At the same time, British sources denied as "utter nonsense" American reports from Moscow that the Soviet Union had offered to trade with Russia.

The American reports on commerce with Britain, purported to be a leak from the Stalin-Berlin interview.

Restrictions Lifted On Phosphate Fertilizer

SASKATOON.—Restrictions on the sale of phosphate fertilizer will be lifted on May 1st.

Saskatchewan farmers said that the amount of restrictions would probably result in a shortage of fertilizer.

SEEDING GOVERNS DELIVERY QUOTAS

OTTAWA.—Trading Minister Macdonald announced in the commonsense that further notice seasonal delivery quotas for seed.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**YOUNG GERMANS BECOME UNRULY**

BRUNSWICK, Germany.—Gangs of young German youths are becoming unruly in the British government's view.

The British government's view is that the young Germans are becoming unruly in the British government's view.

**Japs Not Permitted To Return To Coast**

VANCOUVER.—No Japanese will be permitted to return to the Pacific coast of British Columbia.

The Japanese cannot return to the Pacific coast of British Columbia.

**UNITED STATES STILL CONTROLS SUGAR**

WASHINGTON.—The senate completed action on compromise legislation concerning sugar allocation and price control until next Oct. 31.

OTTAWA.—The possibility has arisen that the government might have to apply the party-control procedure of "closure" to the debate on the bill, if the discussion, now being in the commonsense view of the government's situation, is not shortened.

By this method, the government is enabled to bring a debate to an end within 48 hours after closure is applied.

Parliamentary sources stated that if the government's position of closure would be only for a last resort, the government would be only for a last resort, the government would be only for a last resort.

**PLAN TO ASSIST BRITISH FARMERS**

LONDON.—The Daily Telegraph reported that the British government is planning to assist British farmers.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**WHEAT NEEDS FOR EUROPE UNCHANGED**

OTTAWA.—Preliminary estimates on the wheat needs for Europe are unchanged.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**PRECIPITATION IN THREE PRAIRIE PROVINCES GOOD**

ALBERTA.—The normal fall was registered in the three prairie provinces.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**SEEDING GOVERNS DELIVERY QUOTAS**

OTTAWA.—Trading Minister Macdonald announced in the commonsense that further notice seasonal delivery quotas for seed.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**CANADA STILL HAS TIN CAN SHORTAGE**

OTTAWA.—The shortage of tin cans in Canada is still "critical," the price board said, announcing control of the conservation of tin.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

**END OF JAPAN'S HOUSE OF PEERS**

TOKYO.—Japan's house of peers has formally died after a half-century.

Under the plan, announced by the government, the export of timber would be increased to 100,000 cubic feet per month.

South African naval frigate *Traveller* at the new graving dock at East London, which was opened by Princess Elizabeth and named in her honor during the royal family's tour. As a result of the occasion, the prince was presented with gift of five diamonds. The 723-foot dock will accommodate ships up to 17,000 tons.

## UNITED STATES FOOD PRICES NINETY-FIVE PER CENT. OVER 1939

WASHINGTON.—The U.S. Bureau of Labor Statistics reported recently that on Feb. 15 overall food prices were 95 per cent. above August, 1939, 31 per cent. above a year ago, and only three per cent. lower the all-time high of last December following President Truman's general decontrol order.

It said prices dropped 8 1/2 per cent. from mid-January to mid-February, but that they probably have jumped again since then. It said the decrease undoubtedly would be wiped out by sharp increases in the wholesale market. Wholesale prices jumped about eight per cent. between Feb. 3 and March 15.

D.E.S. attributed the decrease chiefly to declines in eggs, dairy products and meats. But their decrease were more than offset by a rise in fruit, vegetable, cereal and bakery products.

## Norwegians Give Ship Good Care

In July, 1935, Maurice Brown, BBC producer, was in Norway in a motor sailing yacht. When he returned to the U.S. he was in the care of the best sailing ship he had ever seen. It was a small, sleek, white boat, and he was in the care of the best sailing ship he had ever seen. ## BRITAIN TO BUILD 'PEOPLE'S CAR'

A new motor car is now being built for home and overseas which will be the first "People's Car" for Britain. It is a four-wheeled motor car, capable of 60 miles per hour and will cost 100 pounds. It is a four-wheeled motor car, capable of 60 miles per hour and will cost 100 pounds.

Bulk of the trainees will consist of soldiers drawn from the field operations of the Army Active Force Units will first send selected candidates for training who will return to their regiments to pass on the basic principles. After this has been done, while competition at a time period, their own company or school training will only infantry but every other one including Armored Corps, Artillery, Engineers, Army Medical, Ordnance and Signals will eventually become air-minded.

## Where Hope Of The World Rests

The Winnipeg Free Press says security for any nation will be found only in justice, order, prosperity, unity in general propriety, and peace with the great forces of the world. It is there, and not in Moscow or Washington, or any national capital, that the hope of the world rests. If the present crisis in man's mind elsewhere forces that truth at last upon him, it will have served its purpose.

The shade of green in an apple tree's leaves will determine how and the apple will be.

DEMAND FOR POLICE INVESTIGATION REFUSED—Out of a job, Sgt. Ernest Givens, 21, police officer of Crystal Beach, Ont., seen with his family, said he would resign if an investigation were not made into the administration of the village police department. The council accepted his resignation.

## Many Canadians Benefitting By Annuities

OTTAWA.—Between 460,000 and 500,000 Canadian persons in Canada are under superannuation or annuity schemes, and the number in a Labor Department report tabled in Commons.

The department's Dominion annuities branch reported 541 employees had retired in group pension contracts on behalf of their employers. The end of the list of 71,400 employees were registered under the plan.

The number of large employees with superannuation or annuity schemes on behalf of their employers might be "conservatively" estimated at 800,000, officials said.

The last survey the department conducted, in 1934, with Dominion Bureau of Statistics covered 2,700 large employers, of whom 713 reported superannuation or annuity pension schemes for their employees. The employees checked did not include the railways and bank and insurance companies, or Dominion provincial and municipal governments.

## Develops New 'Errorless' Typewriter

NEW YORK.—An "errorless" typewriter with a standard keyboard and 200,000 mechanical parts in Canada are under superannuation or annuity schemes on behalf of their employers. The employees checked did not include the railways and bank and insurance companies, or Dominion provincial and municipal governments.

## First Choice

It set up instead a line visible just across the road, and the operator returned the carriage to the proper position and eliminated the mis-typos.

## Returned To Norway

LONDON.—The last ship to have given a group of Norwegian men the right to become free Canadian citizens, and twice that number of German men of a valuable prize, was recently a ship in port here for the first time.
